Message: There is a possible outbreak in the Political Science Department - I am a grad student & TA, and I know of at least 2-3 PhD students who have tested positive, as well as at least one professor. Lots of absences and multiple outbreaks in undergraduate courses as well - at least 5 of my students in POLI 101 have said they tested positive. The department has not informed us of these at all; we have just passed on the information to each other.

No worries!

Yesterday

Felt the need to reach out and let you (and the folks following this page) know that there's a serious COVID outbreak in the Political Science department. At least one prof out sick confirmed with COVID, multiple graduate students out sick as well. No transparency on this from the department, but word of mouth travels extremely fast. If the faculty and grad students are getting sick, it must be circulating among the undergrads as well (who probably see way more people in a day than us graduates do)
