Multiple Ongoing Exposure

Events

Inbox

2:25 PM

Hello,

I am a student at UBC. I am emailing to report an ongoing exposure event. I live in qxln residence, totem park and there are multiple covid cases localized to 2 floors (5 cases that I know of as of now).

I am also aware of 2 people who attended a CHEM 123 midterm last night, and tested positive since then. I am not sure which room they each wrote the exams, since students were divided into many lecture halls. However, I do know that the lecture halls were very full and we were sitting for multiple hours in close quarters with each other.

I really appreciate the work you do, since no official tracking measures are in place :)
Thank you!
