I am not comfortable

you sharing any personal details of mine. I am not aware if the Covid exposure happened in my classes. It seems unlikely since most students reported other sources. However I seem to have 12-15% of my classes sick right now which is the highest since early Jan. I don't understand why its suddenly peaked and I am concerned. My reporting students are experiencing flu like symptoms.

[REDACTED] email on  
UBC Covid Tracker

Id rather not be identified, so please don't share the classrooms. The building is fine.

I think that is Ok since students are mostly reporting exposure happened elsewhere. Nonetheless I have VERY high Covid rates in my classes.
